

ZENOBĒ

Maximizing the uptake of US-based energy

Why Zenobē?

- ✓ **Experienced:** Zenobē has **1,600 MW / 3,000 MWh** of operational or under construction energy storage projects.
- ✓ **Economic:** Zenobē's batteries help to **reduce energy costs** for all electricity users.
- ✓ **Long term ownership:** Zenobē **owns and operates** all of our systems long-term, setting us apart from many other developers.
- ✓ **Domestic energy:** Once installed, batteries paired with renewable energy provide **dispatchable local generation** over their 20+ operational life.

Zenobē Burns Energy Storage

- ✓ Utilizing ~8 acres of ~15 acre parcel.
- ✓ Adjacent to existing Moraine Road Substation.
- ✓ 100 MW / 400 MWh of energy storage capacity.
- ✓ Landscaping will screen the system from the street.
- ✓ Noise study shows the system will be <45 dBA at nearest receptor, equivalent to a quiet library.
- ✓ Close proximity to solar project already in progress.
- ✓ Project will bring in significant tax revenue to Town and School System.

Frequently asked questions

Are these systems noisy?

Zenobē has conducted a preliminary noise study that shows that the systems will not exceed 50 dBA at the street and will not exceed 45 dBA at the nearest residence. Additional information is available on request.

Are these systems safe?

New York State has worked extensively to develop state-of-the-art guidelines for energy storage fire safety. Zenobē is meeting or exceeding all of these guidelines.

Where do the batteries come from?

Zenobē is working with our suppliers to source domestically made batteries wherever possible. In some cases, equipment will be imported. However, once the batteries are operational, the systems will support the grid with local, renewable energy.
