

Moraine Solar Energy Center

Community open house

Please join AES for an open house meeting regarding the Moraine Solar Energy Center, a solar energy generation facility producing up to 94MW of renewable electricity. Moraine Solar will be located in the town of Burns, Allegany County, New York. The project was formerly owned by EDF Renewables and was acquired by AES in April 2025. The purpose of this meeting is to introduce AES and the Moraine Solar team to the community. We will share important updates about the project, explain what to expect during construction, and provide an opportunity for community members to ask questions and share concerns.

Community members and all interested stakeholders are invited to drop in between 5:30pm and 7:00pm. Light refreshments will be served. If you need any special accommodation, please contact us using the phone number or email address below.

Morainesolar@aes.com
(866) 757-7697

For further information, please visit the project website:
